

ORNAMENTAL BASE COVERS

Snoc cast aluminum base covers are precision molded to add a decorative dimension to straight sided poles. They may be added after the pole is installed.

Style A

Round base
Width: 11.5", 12", 12.5"

MULTI LIGHT ASSEMBLIES

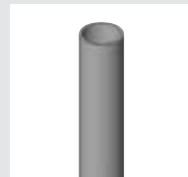

Snoc luminaires for multihead assemblies are all mounted on a central hub designed to fit at the top of the pole. This concept eliminates totally on site drilling which can vary from hole to hole.

The luminaire assembly can be rotated horizontally at will to help achieve perfect orientation with respect to the street and/or pre-installed anchor bolts.

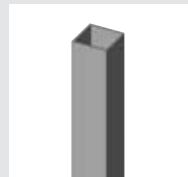

EXTRUSION STYLES

Snoc offers a variety of shaft styles including:

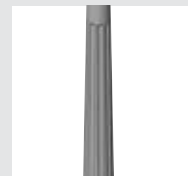

round

square

fluted

cast tapered and fluted

ACCESS HOLES & COVERS

Snoc poles are all supplied with access openings near the base to simplify electrical servicing during and after installation.

Snoc's casting expertise can produce individual, municipal logos and emblems upon request.
